## ABOUT ME

Energetic and curiosity-driven Android developer with 4+ years of experience writing top-quality clean code for high-paced businesses. I learn new stuff every day to be on a top of Android technologies and best practices. I'm working with libraries and tools like: Android X, Android Architecture Components, Koin, Coroutines, Android KTX, and another common libraries.

I'm interested in learning more about Data Science and Artificial Intelligence.

Whom want to look at my code. GO HERE: <https://github.com/ericktijerou>

## WORK EXPERIENCE

### Android Developer

April 2021 - Present

Kanto

- Translate designs and wireframes into high quality code.
- Design, build, and maintain high performance, reusable, and reliable Kotlin code.
- Ensure the best possible performance, quality, and responsiveness of the application.
- Identify and correct bottlenecks and fix bugs.
- Help maintain code quality, organization, and automatization.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.

#### Technologies used:

NDK Coroutines Hilt Architecture Components Clean Architecture Kotlin Firebase

### Android Developer

October 2019 - February 2021

Gfi Perú

- Design, build, and maintain high performance, reusable, and reliable Kotlin code.
- Work with outside data sources and GraphQL APIs.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Translate designs and wireframes into high quality code.
- Identify and correct bottlenecks and fix bugs.
- Help maintain code quality, organization, and automatization.
- Unit-test code for robustness, including edge cases, usability, and general reliability.

#### Technologies used:

App Bundle Dynamic Delivery Coroutines Koin Architecture Components Clean Architecture Kotlin DSL Firebase CI

### Android Developer

December 2018 - November 2019

Stefanini

- Translate designs and wireframes into high quality code.
- Design, build, and maintain high performance, reusable, and reliable Kotlin code.
- Ensure the best possible performance, quality, and responsiveness of the application.
- Identify and correct bottlenecks and fix bugs.
- Help maintain code quality, organization, and automatization.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

#### Technologies used:

Clean Architecture Coroutines Architecture Components ObjectBox Unit Testing Makeup SDK CI

### Android Developer

February 2018 - December 2018

Tekton Labs

- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Design and build advanced applications for the Android platform.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work with outside data sources and APIs.

#### Technologies used:

RxKotlin Clean Architecture ViewModel Room Unit Testing React Native Firebase

### Android Developer

October 2017 - January 2018

Solera Mobile

## SKILLS & TOOLS

### Mobile

### Frontend

### Backend

### Others

## EDUCATION

### Systems Engineer

Universidad Nacional San Luis Gonzaga  
2012 - 2016

### Database Administrator

Universidad Nacional de Ingeniería  
2013 - 2014

## LANGUAGE

English (Basic)

Spanish (Native)

## INTERESTS

Cycling

## PROJECTS

### App FFVV

Facilitate the monitoring of business variables so you can earn more each campaign.

### Asesor de belleza

Live makeup cam to try out real cosmetic products. AR makeover styles including lips, eyebrows, hair color, eyeliner, eye color, and lashes tryout in seconds.

### Mi Negocio Natura

With Mi Negocio Natura you can place orders and follow them from anywhere, keep up to date with news, watch and share the digital magazine.

### Vive BCP

- Design and build advanced applications for the Android platform.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work with outside data sources and APIs.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

**Technologies used:**

RxJava    Android KTX    Dagger    Firebase    Maps SDK    Geofencing    Crashlytics

● **Android Developer**

January 2017 - July 2017

GDC Technology Limited

- Translate designs and wireframes into high quality code.
- Design, build, and maintain high performance, reusable, and reliable Java code.
- Ensure the best possible performance, quality, and responsiveness of the application.
- Identify and correct bottlenecks and fix bugs.
- Help maintain code quality, organization, and automatization.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

**Technologies used:**

Java    Support Library    Retrofit    ButterKnife    Dagger    The Movie Database

● **Software Developer**

February 2016 - January 2017

devAcademy

- Design and build advanced applications for the Android platform.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Work with outside data sources and APIs.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

**Technologies used:**

Ruby    Java    Ruby on Rails    Android    HTML/HAML    CSS/SASS

Discover all the benefits you have as a BCP Contributor, download it and start living in the BCP style.

**San Pablo**

Mobile application San Pablo, book and pay your appointments from anywhere.

**GoGas**

The APP allows you to buy fuel at the "Repsol" stations with the "GoGas" card at a lower price, you can also recharge your prepaid GoGas card from the APP through the PayMe payment gateway.

**Fitadvisor**

It is a digital Fit community where people who seek to lead a healthy lifestyle can connect and interact daily.
